Adjustable Pedestal Base

These specifications, constructions and details were prepared according to the latest technological developments and with the greatest possible care. Aston Building Supplies Ltd. accepts no liability whatsoever for any errors or inaccuracies or their consequences. In the interests of innovation and improvements, we reserve the right to make any necessary changes to the products and systems.

The Aston Heavy Duty Adjustable Pedestal is a professional self-levelling support system designed for raised flooring applications, including ceramic tiles, porcelain paving, stone slabs, concrete panels and timber decking.

Designed to compensate for uneven surfaces, the pedestal features a self-levelling head that adjusts to slopes of up to 7%, helping to create a stable and level finished surface. Suitable for patios, balconies, roof terraces and other raised flooring projects, it provides a strong and practical solution for both residential and commercial installations.

Manufactured in the UK from durable, weather-resistant and UV-stable plastic, each pedestal can support up to 1300kg. The system is easy to install and adjust, allowing accurate height adjustment for a professional finish.
